SPECTRUM TECHNOLOGIES USA INC. MOVE TO NEW LARGER TEXAS FACILITY

We are very pleased to announce that due to the continuing growth of our North American operations, Spectrum Technologies USA Inc. has moved its HQ to new, larger premises in Fort Worth, Texas.

The new facility at Fossil Creek provides increased office space for our expanding US sales and service teams. It also provides extra room for the stocking of a comprehensive inventory of spare parts as well as a dedicated maintenance workshop for servicing equipment in line with our commitment to serve better our North and South American customer base.

In addition, the new Fort Worth facility is now also able to offer Advanced Laser Maintenance training courses. We welcome customers to register their initial interest in this new service and learn how Advanced Laser Training packages can be tailored to meet your specific CAPRIS / Nova laser system requirements.

The move from the old offices in Southlake took place at the end of November. The official opening took place on Tuesday 1 December 2009 with a ribbon cutting ceremony by Spectrum CEO; Dr. Peter Dickinson and Spectrum USA General Manager; Jonathan Golding.

The telephone and fax numbers for the new office in Fort Worth have also changed; the old number in Southlake now has a recorded message informing people of the new phone number.

The new Spectrum Technologies Texas details are as follows:

Spectrum Technologies USA Inc
Fossil Creek Tech Center
3934 Sandshell Drive
Fort Worth, TX, 76137
USA

Tel: +1 817 232 2373
Fax: +1 817 232 4354
